PROJECT NUMBER
CZ.01.1.02/0.0/0.0/20_321/0025155

PARTNERS:

The project focuses on the development of a modular system for biometric wearable devices, in particular biometric bracelet and biometric chest belt. The modular system will be used for long-term and short-term measurement and sensing of selected biometric data - skin electrodermal activity (EDA/GSR), heart rate variability (HRV) and temperature.
